Assignment 2 Question 2

How to access the API in the LTA?

Read the road incidents data from the following API(Application Programming Interface)
http://datamall2.mytransport.sg/ltaodataservice/TrafficIncidents

Read the road traffic bands data from following the API
http://datamall2.mytransport.sg/ltaodataservice/TrafficSpeedBandsv2

Example

I want to access

http://datamall2.mytransport.sg/ltaodataservice/TrafficIncidents

Get the register key and you can test using the Postman software https://www.postman.com/.

See my postman below. You need to implement using the python and you will get the same result.
